EXPLANATION OF SYMBOLS

This comprehensive alphabetical listing by states and counties shows the various photography coverages secured for counties by the Agricultural Stabilization and Conservation Service and its predecessor agencies. Aerial and photo-index negatives are available for these coverages and reproductions can be prepared for sales purposes. The objective has been to assign a symbol to a county the first time it was photographed and to use the same symbol each time the county was rephotographed. For administrative purposes a special symbol was assigned to some counties and used on one or more recoverages. In such cases both symbols are listed. The special symbol is tied to the year of photography by underlining both the symbol and the year of photography.

ASCS photography is flown at a scale of 1:20,000 with an 8½-inch lens on panchromatic film unless otherwise noted as follows:

A - Scale of 1:40,000	R - Infra Red Film
C - Scale of 1:15,840	W - 6" Lens
E - Scale of 1:10,000	Z - 12" Lens
P - Partial County Coverage	

All photography coverage secured on nitrate film during years of 1936 through 1941 has been transferred to National Archives. Requests for information relative to this coverage should be addressed to:
